Art Unit: 1791

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-6, drawn to a method for making a die, classified in class 264, subclass 2.5.
- II. Claims 7-11, drawn to a method of fabricating a resin plate, classified in class 264, subclass 1.7.
- III. Claim 12, drawn to a method of fabricating a lens array, classified in class 264, subclass 1.1.

Inventions I, II and III are considered to be separate or distinct in that they are distinct inventions that do not have to be used together. For instance, the method for making the dies does not necessarily have to be employed in a subsequent resin plate fabrication method, as the die can be used in casting operations and does not have to be used in injection molding. Also, the methods of making the die and making the resin plate do not have to be used in a plate stacking method as set forth in Group III.

This application contains claims directed to the following patentably distinct species:

That where a circular periphery is drawn around each lenslet; and

That where a groove is formed along the bisector of a line drawn between each pair of lenslets.

The species are independent or distinct because they involve different methods of operation –ie, a circular periphery is different and distinct from a ridge.

Art Unit: 1791

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claim is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).
